Stephen Mark Cook

PhD research student in the Information Security Group at Royal Holloway, University of London (RHUL). Previously a Research Assistant in the in the same group on the CyFer project. Holds an MSc in Cyber Security and a BSc (Hons) in Computer Science, and is seeking an opportunity in information security research, and software development.

Work Experience

Research Assistant CyFer Project, Information security group, Royal Holloway University

January 2023 - August 2023

- Investigated privacy, bias and trust in female-oriented health technologies with the focus being on fertility-tracking apps and IoT devices.
- Developed a digital forensic methodology to assess device security and privacy policies. This includes performing network, software and hardware analysis.

Junior software engineer, SAGE, Cobalt Business Park

September 2022 - January 2023

- Worked alongside a team developing and maintain internal tools and software.
- Maintained legacy software and consulted with clients to define product scope and requirements.

Education

Centre of Doctoral Training in information security at Royal Holloway University (PhD)

September 2023 - September 2027

Distinction, Cyber Security at Newcastle University (Masters)

September 2021 - September 2022

1st Class, Computer Science, York St John University (Bachelor)

September 2017 - September 2020
